

Agenda

- MIAPPE v2 : EPPN2020 doc
- IPPN data management group
- organisational document
 - Feedback (Roland)
 - Add EPPN/Emphasis on MIAPPE.org>projects page

Notes

MIAPPE v2 environment

should be put out for consultation / discussion

Is it v1.2 or v2 ?

IPPN Data management functioning

Lead by Astrid & John Doonan

MIAPPE could become IPPN Data group

Would like to be supportive of MIAPPE. Tiny proposal in common. Strong overlap. Closely collaborate. Helps to kick off IPPN Data management group. Data processing and data management are different topics.

Decisions

- Add EPPN/Emphasis to the MIAPPE/projects page
- MIAPPE v2:
 - Integrate document from Francois with MIAPPE v1.1: Should be done Hanna, Pawel, Cyril, Paul (Proof reading), Bjorn, Matthias, Carolyn + student, Elixir peoples (Daniel), François, Philippe RS ? . Pawel initiate the discussion. Focus only on merging. The scientific debate should be opened.
 - Composed document
 - Email to François on behalf of the steering to inform him on the decision (Cyril)
- IPPN
 - Carolyn starts google doc to share names of people able to contribute to common doc. This group plus Astrid Junker and John Doonan to be involved in drafting initial list of names. Try to align expertise to topics in IPPN charter

for IDaM. Look for a person to coordinate IDaM who has time to make that happen. Goal is to have not only group leaders but membership.

- MIAPPE outreach in IPPN Meeting in Nanjing in October 22-26 2019 in Nanjing? https://ipps2019.plant-phenotyping.org/ipps_home
 - Outreach: In the past:
 - presentation of principles, afternoon of “BYOD” training (purely to train on current version)
 - EMPHASIS brought together different groups and problems
 - Idea to get some people who can attend IPPS in Nanjing trained. Endcap the meeting with a mini-session (3h or so; dependent on who signs up). Carolyn to coordinate given chances that other MIAPPE SC unable to attend (hopefully someone in the group might find time)
 - Carolyn to propose to use IPPN funding to support a train-the-trainers session to get someone prepared to run a MIAPPE session at IPPS in Nanjing. Once someone identified, put them in touch with Cyril ASAP then will find dates for the TtheT session. Perhaps query Tracy Teal with the Carpentries. <https://carpentries.org/team/>
- Organisation document : continue by email (Cyril)
