

Join Zoom Meeting

<https://inrae-fr.zoom.us/j/91554403061?pwd=Y3I5aTl4ZlhWeDhXa29nNFJ3dFIOQT09>

Attendees

Cyril Pommier, Pawel Krajewski, Bjorn Usadel, Elizabeth Arnaud, Paul Kersey, Carolyn Lawrence Dill, Matthias Lange

AGENDA and notes

General introduction and perspectives

- NAPPN
- What do we want to do by now as a SC. What are the next action for MIAPPE.
 - PKr: revive the working groups. What topics need attention.
 - BU: we need to get work starting again. There are national activities which we should integrate. We should link them and promote MIAPPE. Address open issues. Promotion and Further dev.
 - EA: Ok with previous statement. MIAPPE needs promotion in the CGIAR. Possible focus on environmental aspects. Probably the single topic for 2022.
 - PKe: There have been a lot of community promotion. But feels a little bit far away from the MIAPPE current activities. Happy to step back if need be. Need to recruit people keen to work on agenda for next developments/continued adoption.
 - ML: MIAPPE was a very good nucleus 10 years ago. There are activities that could take over MIAPPE role: ELIXIR smart farming, etc... MIAPPE has an important brand. Continue and can contribute among other things with environment.
 - CP:
 - CLD: About to be replaced. Choose somebody. here is a list a candidates
 - Noah Fahlgren
 - <https://www.danforthcenter.org/our-work/principal-investigators/noah-fahlgren/>
 - <https://www.semanticscholar.org/author/N.-Fahlgren/2204785>
 - <https://scholar.google.com/citations?hl=en&user=ye9Spv4AAA AJ>
 - BU: done some reviews.
 - PKr: seen some presentation in phenome days in US.
 - More biologist
 - Jennifer Clarke (the only one not a plant biologist by training)
 - <https://statistics.unl.edu/jennifer-l-clarke>
 - https://scholar.google.com/citations?user=_hkK35QAAAAJ&hl=en
 - Statistician. Mainly on human disease. Now moved to plant pheno

- James Schnable
 - https://agronomy.unl.edu/docs/faculty/cv/JSchnable_March2021.pdf
 - <https://www.semanticscholar.org/author/James-C.-Schnable/2262774>
 - https://scholar.google.com/citations?hl=en&user=cik4JVYAAA_AJ
- David LeBauer
 - Plant physio
 - Computational, systems to understand pheno and traits
 - Capacity to approach things in an abstract way.
 - <https://datascience.arizona.edu/person/david-lebauer>
 - <https://www.semanticscholar.org/author/David-LeBauer/2056675>

TODO (by 26 FEB): Pitch with the list of things that need to be achieved + mail to miappe mailing list + mail to other lists (CP). NAPPN did something like that with provisional by laws. Renew the mailing list membership. Revive the provisional by laws (PKr, BU see [here](#)).

TODO NAPPN: Approach 1st Noah then 2nd David then 3rd James 4th Jennifer. Prepare an email to those people (ML)

IEEE Maria Palombini <https://beyondstandards.ieee.org/author/mpalombini/>

3. NAPPN contact4 (Single Choice) *

6/6 (100%) answered

Noah (0/6) 0%

David (0/6) 0%

James (4/6) 67%

Jennifer (2/6) 33%

4. NAPPN contact3 (Single Choice) *

6/6 (100%) answered

Noah (0/6) 0%

David (1/6) 17%

James (1/6) 17%

Jennifer (4/6) 67%

How we managed creating NAPPN is described here, if useful:

<https://acsess.onlinelibrary.wiley.com/doi/10.2135/tppj2018.08.0006>

Standard evolutions: MIAPPE for environment (Pawel)

"Environmental characterization: a proposal from EMPHASIS-EPPN2020 to ELIXIR and MIAPPE" by Francois Tardieu, 2020 (?) - revive a group working on this, send the document to Committee, a meeting on this end of Feb, BU, ML, CP interested

Standard evolutions:

- Quick minor update : new fields that triggers little discussions (Cyril)

Propositions for v1.1.3: <https://github.com/MIAPPE/MIAPPE/milestone/5>

TODO: tidy thing for a communication toward the community . Show this at the next call.
(CP)

Cyril sneds a doodle for the next SC end feb.

- Other issues to review that could lead to a V2
review in the backlog ? <https://github.com/MIAPPE/MIAPPE/issues>

I don't think it's contradictory to do the governance piece and continue development. People are more likely to get involved if they see an active community than a quiescent one.

It's google's fault!

Web site updates

- Add Additional templates.
- Link to RDM Kit
- Remove Data
- Announce new version and consultation ?
- Move About/Release to a dedicated page
- Publish organizational document:
https://docs.google.com/document/d/1XJOrkT7dUrMb0EoBAzKyz_BsaQALRDHaYbfhSnXkXyc/edit
-

Outreach activities

[Promote data templates](#)

[Promote metadata templates](#)

Any other business

There is a person from IEEE who is trying to get people together on sensors to data. Shall I connect her to Cyril for potential connections?
